

# Field Day | June 24th

Michael Attard: Bio-fertiliser Application Trial

## Regenerative Agriculture

**WHEN:** Wednesday June 24th | 8:30am - 4:00pm  
**RSVP:** 07 4968 4200 or [info@reefcatchments.com](mailto:info@reefcatchments.com) by Friday 19th June  
**COST:** This event is free for attending landholders

**FOCUS:** BIO-FERTILISER APPLICATION TRIALS AT ATTARD'S FARM (NORTH ETON) USING REGENAG® ALTERNATIVE FERTILISER STRATEGIES.

**PROGRAM:**

### TRIAL OVERVIEW:

Eton grower Michael Attard has been working with RegenAG's Kym Kruse to create biologically based mineral fertilisers and other soluble mineral inputs from readily available and on-farm materials. The application regime has been applied to the entire 100 hectare farm.

### MORNING WORKSHOP AT CWA HALL, NORTH ETON.

Overview of the trial on Attard's farm at North Eton, comparison of conventional vs alternative fertiliser costs.

### OVERVIEW OF REGENAG® ALTERNATIVE FERTILISER STRATEGIES AND METHODS.

### FIELD TRIP.

Afternoon site visit to **ATTARD'S FARM** to inspect cane crop, practices, harvest figures, trial update and where to from here.

### MORNING TEA AND LUNCH PROVIDED.

### ACKNOWLEDGMENT:

This project is a joint partnership delivered by Reef Catchments and RegenAG® through funding from the Australian Government.
